HOZHO + AKEI

HISTORIC GOLD-DISTRICT EXPLORATION CLAIMS

Stanton / Weaver Mining District | Yavapai County, Arizona

2 LODE CLAIMS	41.3212 ACRES	$23,900
Hozho + Akei	BLM recorded total	Combined asking price

THE OPPORTUNITY

Two adjoining unpatented lode mining claims offered beside the historic Leviathan-Germanic mining properties. The surrounding mining area has documented gold-producing history, original assays, mapped quartz veins and historic exploration work. The appeal is a defined exploration opportunity with an unusually useful historical paper trail - not a represented reserve.

ASKING PRICES

Hozho - 20.6600 acres	**$14,900**
Akei - 20.6612 acres	**$11,900**
Both claims - 41.3212 acres	**$23,900**

Seller-provided property photograph. Modern claim boundaries, access, mineral title and physical conditions require buyer verification.

WHY THIS GROUND MERITS A CLOSER LOOK

Historic production and workings. The nearby Leviathan is recorded as a past-producing gold mine, with reported production years 1934-1941. The records describe historic underground workings; no verified total Leviathan production tonnage has been established in these files.

Early federal records. Mineral Survey 580 documents historic Leviathan ground; Mineral Survey 2888 documents Germanic and adjoining claims in the early 1900s. These historical records do not determine the boundaries of the modern Hozho and Akei locations.

Mapped vein system. The 1937 Neill engineering report describes a principal vein trending approximately S65 W, northward dipping, with step faults and smaller veins associated with Germanic and Denver. His interpretation of continuity is not proof of gold-bearing ore beneath the offered claims.

Later exploration. The archives reference Los Suertes drilling and geophysical work and Homestake mapping/sampling. Butler's March 1984 proposed drilling layout is a plan, not proof those proposed holes were completed; he also reported that earlier work had apparently not shown significant ore-grade material.

1977 IRON KING ASSAY OFFICE - SELECTED LEVIATHAN SAMPLES

Sample ID	Gold (oz/ton)	Silver (oz/ton)
1416	0.302	0.40
1417	0.118	0.58
1418	0.390	1.43
1419	0.106	0.43
1420	0.956	1.14

Source: Iron King Assay Office certificate dated 14 January 1977, with a matching surface sample-location map (reproduced on pages 4-5). These are selected results from the HISTORIC LEVIATHAN property. They are not representative grades, reserves or assays from Hozho/Akei.

THE CLAIMS AND WHAT REMAINS TO BE TESTED

BLM case record	HOZHO	AKEI
Serial number	AZ106748919	AZ106748920
Case status*	Active	Active
Type	Lode claim	Lode claim
Recorded acreage	20.6600	20.6612
Location date	09 Sep 2025	09 Sep 2025
Next payment shown	01 Sep 2027	01 Sep 2027

*Administrative status is from BLM MLRS screenshots supplied by the seller on 4 November 2026; it is not a live title certificate or a legal survey. Claims are offered as unpatented mining claim interests, not fee-simple land.

CURRENT FIELD OBSERVATIONS (SELLER-REPORTED)

- Prospecting and sampling across the two claims reportedly indicated approximately 3 grams of gold per ton in placer material. No certified lab report, sampling protocol or chain of custody has been supplied for independent verification.
- An underground mineralized structure or ore-bearing zone is reported by the seller. Its location, continuity, grade, dimensions and economic significance have not been established.
- The claim owner reports having physically staked the claims as adjoining rectangles. Public BLM display polygons, particularly Akei, are generalized and should not be used as surveyed corner positions.

WHAT A PURCHASER SHOULD VERIFY

Recorded location notices, monument positions, mineral-title status, any conflicting patented rights, legal access, BLM maintenance/transfer requirements, assay results from the offered ground, and any intended exploration permits. Nearby historical assays are exploration context, not a forecast of yield.

Seller-provided panning photograph

Photograph shows a pan with concentrates and gold-colored particles; no mineral identification or weight is independently established by the image.

IRON KING ASSAY OFFICE | 14 JANUARY 1977

Reproduced from the 102-page ADMMR Richard E. Mieritz Leviathan archive, PDF page 8. The historic certificate provides gold and silver values for five selected samples. It does not identify an average ore-body grade or establish results for Hozho or Akei.

ASSAYER

Reference samples 1416-1420 are paired with the historic surface map on the following page.

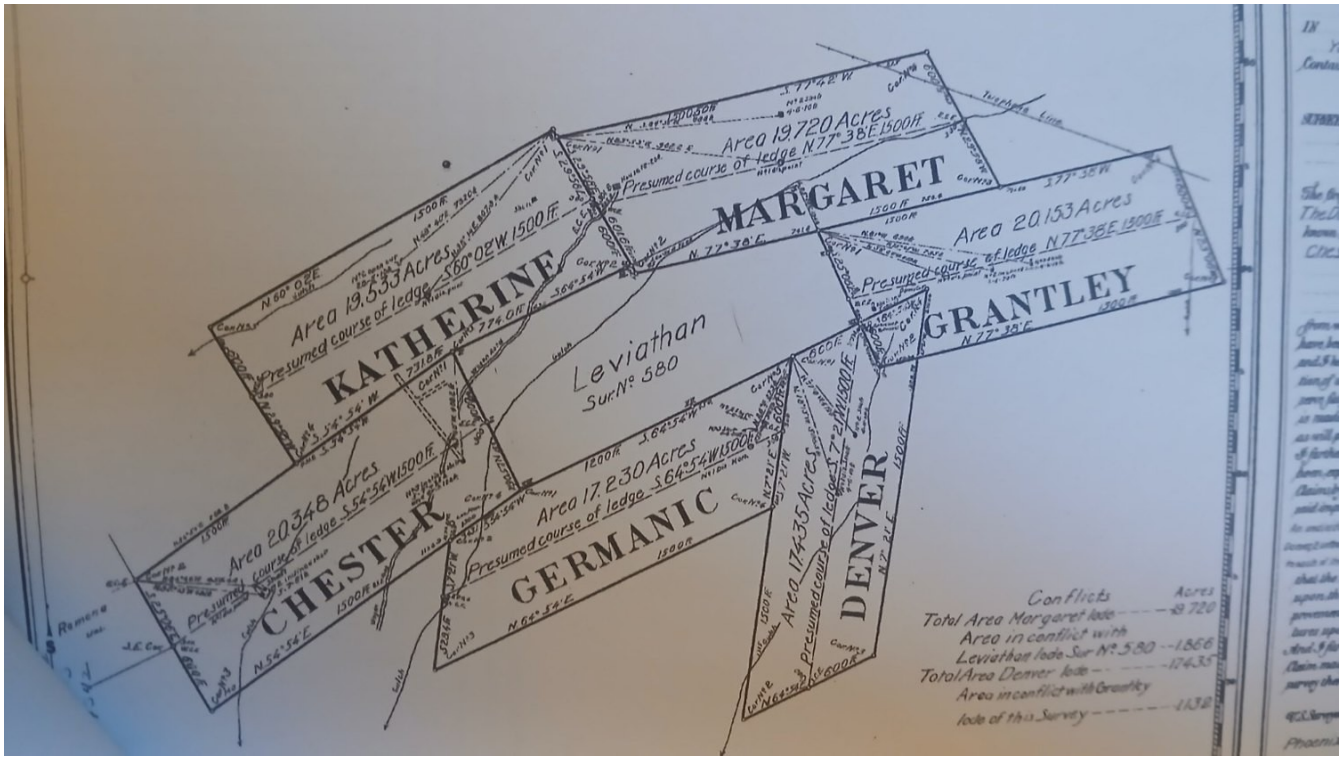

1977 LEVIATHAN SURFACE SAMPLING MAP

Reproduced from the same ADMMR archive, PDF page 9. The map identifies the approximate original sample positions on the historic Leviathan claim. Historic map bearings and corners have not been georeferenced to the present-day Hozho and Akei claims.

This archival drawing is illustrative geological evidence only; it is not a modern survey, and its sample positions are not plotted on Hozho or Akei.

ORIGINAL HISTORICAL SURVEY CONTEXT

Seller-supplied photograph of the historic 1911 federal claim plat identifying the Germanic, Denver, Chester, Katherine, Margaret and Grantley properties around the Leviathan survey.

RECORDS SUPPORTING THIS PRESENTATION

- ADMMR / AZGS Leviathan archive: Richard E. Mieritz collection, 102 pages; 1977 assay certificate p.8, sample-location map p.9 (source ZIP: ADMM-1554347153404-917.zip).
- Doug K. Martin collection, 34 pages: 1937 J. W. Neill engineering report and Charles R. Butler, March 1984 Leviathan Project proposal (source ZIP: ADMM-1554452542327-123.zip).
- Leviathan (Yavapai), AzMILS No. 283, ADMMR file, 41 pages, including historical field reports and Los Suertes reference (source ZIP: ADMM-1552433255716-817.zip).
- Federal Mineral Surveys 580 and 2888; historic survey photograph supplied by seller.
- BLM MLRS seller screenshots of Hozho AZ106748919 and Akei AZ106748920, captured 4 Nov 2026.

IMPORTANT: Historical gold values, maps and workings concern neighboring ground. No mineral resources, reserves, guaranteed production, or geologic continuity into Hozho/Akei have been established. This packet is historical research and marketing information, not an appraisal, legal title opinion, survey, engineering feasibility study or investment guarantee.
